Minutes of IHC Meeting  
Community Headquarters Building  
3 February 1984

STAT

STAT

The February IHC meeting was held on 3 February 1984. It was the first meeting chaired by [ ] the new IHC Chairman, replacing Mr. [ ] who became the new IHC Vice Chairman. [ ] advised that the DDCI wants to raise the status of the IHC to that of the SIGINT and COMIREX Committees and give it higher visibility.

[ ] (CIA/ORD) and [ ] gave a briefing on the RECON GUARD security control system being tested at CIA. This system would verify that remote users accessing RECON thru COINS would receive only information for which they are authorized. The test evaluation completion date for the project is 1 June 1984. Status reports will be published about once or twice a month. Members were advised by Clarus Rice (CIA) that the RECON GUARD systems concept is valid for CIA, DIA, NSA and DOS, but that the criteria for information release to others is very complex.

STAT

[ ] (ICS/HC) briefed the members on the joint STIC/HUMINT Committees' joint report on open source S&T exploitation. He advised that an Executive Steering Group was formed and that it has recognized the need for high level attention. The first emphasis is to improve the current system. Next is to educate S&T analysts on sources of material. Emphasis was placed on collaboration of efforts among collectors/processors of S&T intelligence.

STAT

[ ] gave an update on IHC efforts to identify IC video disc requirements. Issues have been identified and initial draft video disc standards presented.

STAT

[ ] Chairman of the Formats Standards Subcommittee (FSS), announced that CIA and NSA are in complete compliance with the standard Community information reporting format. He also said that DIA is in substantial compliance, but that Department of State (DOS) is not complying at all. He expressed the FSS concern about the DOS situation. He further advised that analysts at NSA have reported that reports received from the other agencies, less DOS, are much more readable and meaningful. Information handlers at NSA also report the information is significantly more easily handled (received, indexed, stored, etc.).

STAT

[ ] identified a proposal being staffed within the IC to require that intelligence reports at the national level, which are sent to other departments or agencies, be sent electrically, unless they are highly classified. A second part of this proposal is that for reports which cannot be sent electrically to have a summary or precis prepared and disseminated in the standard electrical format.

STAT

[ ] Chairman of the Data Standards Panel (DSP), related that the DSP hopes to have a report out within the next few months which addresses sensitivity indicators and country codes. His group is also looking into security classification controls and economic communications.

STAT

[ ] gave a CIRS security update. He related that no firm dates on the plan have been set. He reiterated the overview of the previous meeting.

STAT

The members were advised that the next IHC meeting will be held at [ ]  
[ ] 5-7 March.
